

Software Engineer with 13 years of experience building backend services and infrastructure across monolithic and microservices architectures. Proven track record leading teams, shipping ML-powered systems, and driving cross-team collaboration. Equally effective as an individual contributor and as a technical leader.

## WORK EXPERIENCE

---

### Nordnet Bank

Senior Software Engineer

Stockholm, Sweden

Jul 2025 – Present

- Facilitating the split of a core team into two separate teams to improve focus and efficiency.
- Leading AI-driven decommissioning of on-prem authentication, migrating services to cloud-based identity.
- Driving collaboration and leading without a title in complex situations, recognized for creating psychological safety on the team.

### Voi Technology

Tech Lead / Senior Backend Engineer

Stockholm, Sweden

Aug 2022 – Jul 2025

- Built the company's first Go/ML service for realtime inference on scooter photos, improving parking compliance verification.
- Led a team of 7 engineers delivering new products, coordinating directly with product and business stakeholders.
- Mentored engineers on professional growth.

### Pensionera

Senior Backend Engineer

Stockholm, Sweden

Aug 2021 – Jul 2022

- Refactored Go microservices router and database packages, reducing boilerplate and improving maintainability.
- Tracked down and fixed memory leaks in Go microservices with pprof and delve.
- Designed and built a Node.js microservice for PDF generation, replacing a manual workflow.

### Pseudocode, Inc. (Freelance)

Senior Engineer

San Diego, California, USA

Mar 2017 – Aug 2021

- Built an Electron desktop app with Vue.js/Vuex and cross-window state syncing, deployed to macOS and Windows.
- Developed and maintained payment integrations across 5 countries (Stripe, PayPal, PagSeguro, iDeal, Yandex).

### Brandetize

Fullstack Engineer

San Diego, California, USA

Nov 2012 – Mar 2017

- Built a Go service for automated MSSQL backups with offsite storage on AWS S3.
- Managed a team of developers, coordinating delivery across multiple client projects.
